

NeXsora Solutions was born from a family-founded business launched during a challenging economic period.

In 2021, Judd, Damon, and Steve Mintz founded TMG Business Solutions with a simple mission: help businesses access valuable tax incentives, starting with the **Employee Retention Tax Credit (ERTC)**. As companies faced unprecedented financial pressure, TMG became a trusted resource for recovering capital and improving cash flow. What began with the **ERTC** quickly expanded into a broader platform of tax recovery, business incentives, and strategic consulting, generating billions in financial value for businesses nationwide.

NeXsora Solutions emerged as a strategic growth and business development company focused on educating the marketplace, building relationships, identifying opportunities, and connecting businesses with impactful solutions.

Today, NeXsora serves as the front door to a growing portfolio of innovative business services. Working alongside **TMG Business Solutions**, **NeXsora** helps employers access programs designed to reduce costs and strengthen financial performance.

Our solutions include:

- AI-powered Predictive Healthcare
- Tax Recovery Services
- Research & Development (R&D) Tax Credits
- Employee Benefit Strategies

Rather than simply offering products or services, **NeXsora** identifies opportunities, educates decision-makers, and connects organizations with proven solutions that create measurable financial results.

We believe every business deserves to know every opportunity available to improve its financial future. That mission drives **NeXsora** today as we help organizations reduce costs, recover capital, improve employee well-being, and build stronger, more resilient businesses.

Identify opportunity. Create value. Build stronger businesses.
